How to Convert Your GPA to a 4.0 Scale (from www.collegeboard.com)

Colleges report GPA (grade point average) on a 4.0 scale. The top grade is an A, which equals 4.0. This is the standard scale at most colleges, and many high schools use it.

If your high school uses a different or weighted system, you need to convert your GPA to a 4.0 scale for this tool. Talk to your school counselor or get a rough conversion by substituting these values:

A+ (97-100) = 4.0 A (93-96) = 4.0 A- (90-92) = 3.7	C+ (77-79) = 2.3 C (73-76) = 2.0 C- (70-72) = 1.7
B+ (87-89) = 3.3 B (83-86) = 3.0 B- (80-82) = 2.7	D+ (67-69) = 1.3 D (65-66) = 1.0 E/F (below 65) = 0.0

Rubrics described (cmu.edu)

What are rubrics?

A rubric is a scoring tool that explicitly represents the performance expectations for an assignment or piece of work. A rubric divides the assigned work into component parts and provides clear descriptions of the characteristics of the work associated with each component, at varying levels of mastery.

Advantages of Using Rubrics

Using a rubric provides several advantages to both instructors and students. Grading according to an explicit and descriptive set of criteria that is designed to reflect the weighted importance of the objectives of the assignment helps ensure that the instructor’s grading standards don’t change over time. Grading consistency is difficult to maintain over time because of fatigue, shifting standards based on prior experience, or intrusion of other criteria. Furthermore, rubrics can reduce the time spent grading by reducing uncertainty and by allowing instructors to refer to the rubric description associated with a score rather than having to write long comments. Finally, grading rubrics are invaluable in large courses that have multiple graders (other instructors, teaching assistants, etc.) because they can help ensure consistency across graders and reduce the systematic bias that can be introduced between graders.
